

# **Andrew Nater, Full Stack Engineer & Leader**

## **OBJECTIVE**

**Develop frontend-heavy web applications on a high performing engineering team.** I'm passionate about creating user interfaces that are intuitive, accessible, and maintainable. I thrive in autonomous, cross-functional product development teams.

## **EXPERIENCE**

### **Software Engineering Manager | Fuzzy Pet Health | October 2021 – June 2023 (Company Closed)**

- Created the frontend foundation for Fuzzy's internal tools, including automated unit testing, Storybook component library, and continuous integration & deployment, enabling us to ship features faster.
- Oversaw development of admin & subscription API services and integrations with 3rd party platforms handling e-commerce, inventory fulfillment, customer support, and marketing.
- Managed a remote team of frontend, backend, and full stack engineers

**Tech Stack:** Typescript, React, Redux, Tailwind CSS; Ruby, Rails, Sidekiq; Redis, Postgres; AWS

### **Lead Software Engineer | Fuzzy Pet Health | April 2021 – October 2021**

- Led the redesign of Fuzzy's iOS and Android apps and re-architecture of the vet chat .
- Wrote and reviewed code and system architecture across web, iOS, and Android projects.
- Collaborated with product directors, product designers, and executives to develop a product roadmap and set expectations for project delivery.

**Tech Stack:** iOS, Swift; Android, Kotlin; Ruby, Rails, Sidekiq; Redis, Postgres; AWS

### **Senior Software Engineer | Silversheet, AMN Healthcare | April 2020 – April 2021**

- Developed frontend and backend for a medical credentialing SaaS serving hundreds of healthcare businesses and thousands of providers.
- Became sprint team lead within 6 months.
- Established culture of test driven development, increasing test coverage on new code to 94%.

**Tech Stack:** HTML, CSS, Javascript, React; Ruby, Rails, Sidekiq; Redis, Postgres

### **Frontend Developer | Full Sail University | May 2018 – April 2020**

- Developed the frontend for a learning management system serving thousands of students and faculty.
- Introduced frontend unit testing and improved accessibility for student's with vision impairments.
- Created the frontend interview code challenges and on-boarding documentation.

**Tech Stack:** HTML, CSS, Javascript, React, Redux, Jest, Webpack

## **Andrew Nater, Full Stack Engineer & Leader**

### **Co-founder & Developer | Wellness | June 2017 – April 2020**

- Co-created a mental health app for iOS, including the branding and UX/UI design.
- Developed the Wellness API server and marketing website.
- Managed customer support and marketing activities.

**Tech Stack:** iOS, Swift, Objective-C; Typescript, React, Node.js, Express; Firebase

### **Software Engineer | Wyndham Vacation Ownership | January 2016 – June 2017**

- Developed the frontend for internal tools and customer-facing web applications.
- Conducted code reviews and provided direction to the offshore development team.
- Wrote technical requirements, designed wireframes and user experience diagrams

**Tech Stack:** HTML, CSS, JavaScript, jQuery, React

### **Co-founder & Developer | Trim Media | May 2012 – April 2016**

- Managed web design projects for small businesses and startups.
- Developed responsive websites using HTML, CSS, and JavaScript.
- Administered web hosting and domain registration for clients with various providers.

### **Genius (Mac Technician) | Apple | July 2010 – May 2015**

- Provided customer support, troubleshooting, and repairs for Mac, iPhone, iPad, and iPod devices.
- Contributed to key initiatives to improve the customer and employee experience.

## **EDUCATION**

### **Bachelor of Arts, Digital Media | University of Central Florida | 2015**

### **Associate in Arts, General Studies | Valencia College | 2012**
